Special Offers is a Shopify discounting app that allows store owners to take the work out of running discount codes, sales, and volume discounts for their customers. The app is compatible with Shopify's mobile application and optimized to make shopping from smartphones user-friendly.

Please read the ☞ FAQs before Installing Our App & Once Installed Test it before doing any promotions.

## Paid Version

☆ Discount / Sale - Boost sales and reward your loyal customers with automatic discounts.

☆ Volume Discounts - Encourage your customers to save more when they buy more products.

☆ Spend Amount, Get Discount - Spend $X Amount on chosen collections or products and get percentage or $ discount

☆ Upsell / Cross-sell -
One of the most effective way to increase your revenue is to sell more to existing customers.

☆ Buy X for $ - Buy a product/products for a fixed price or percentage.

☆ Buy X Get Y - Beta Version( If you find bugs report us)- Buy a product and get a percentage/amount discount for the select product.

## Promotions

Not only you can create offers from our app but also promote the offers you created.

☆ SMS - Currently we support all merchants but only can send SMS for US customers.

☆ Push Notifications - We have partnered with PushOwl to send Push Notifications.

## Common Features

☆ **Scheduling** - Choose exact date & time for each offer to begin, or end.

☆ **Customer eligibility** - Create specific tags to include or exclude customer types, i.e. members-only offers or customers with accounts.

☆ **Mobile optimization** - The majority of customers browse + purchase through a smartphone or tablet, so the app is optimized to make the most of the smartphone shopping experience.
